

06AL51

Fifth Semester B.E. Degree Examination, June 2012 **Management and Entrepreneurship**

Time: 3 hrs.

Max. Marks:100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

| | | $\underline{PART-A}$ | |
|---|----------------------|--|--|
| 1 | a. b. | Define management. Briefly discuss about the process of management. Distinguish between administration and management. | (08 Marks) (04 Marks) |
| | c. | List the 14 principles of administrative management and elaborate any two. | (08 Marks) |
| 2 | a. b. c. | Define planning and briefly explain its importance. Distinguish between policy and procedure. List and explain the steps in planning. Mention at least four limitations of planning | |
| | | | (10 Marks) |
| 3 | a. | Discuss the meaning, importance and factors governing the span of management. | |
| | b. c. | List all the 16 principles of organizing. Define delegation. Brief about advantages and barriers of effective delegation. | (06 Marks) (04 Marks) (10 Marks) |
| 4 | a. b. c. | Define direction and brief about the main five requirements of effective direction. Define motivation. Show the motivation process by means of diagram. List all the six theories of motivation and discuss about Maslow's need hierarchy to | (05 Marks) theory. |
| | d. | List and explain the steps in control process. | (05 Marks) (05 Marks) |
| | | PART - B | |
| 5 | a. b. c. | Define an entrepreneur. Briefly discuss about types of entrepreneurs. Explain Entrepreneur Development Programme (EDP). Mention all its models. Distinguish between entrepreneur and intrapreneur. | (10 Marks) (05 Marks) (05 Marks) |
| 6 | a. b. | List and briefly discuss about the steps to start a SSI. Write a brief note on government policies towards SSI, is objectives and classifications. | (12 Marks) tions. (08 Marks) |
| 7 | a. b. c. d. | Write a note on the aims and objectives of KIADB. Brief about important activities of KSSIDC. Write short note on KSIMC. Write a note on TECSOK. | (05 Marks) (05 Marks) (05 Marks) (05 Marks) |
| 8 | a. b. c. | Define project. Discuss briefly about project classification. List out common errors in project report. Explain briefly. List at least five network techniques. List the advantages and limitations of PERT. | (06 Marks) (08 Marks) (06 Marks) |
| | | * * * * | |
| | | | |

Important Note: 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.

2. Any revealing of identification, appeal to evaluator and /or equations written eg. 42+8 = 50, will be treated as malpractice.

Important Note: 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages. 2. Any revealing of identification, appeal to evaluator and /or equations written eg. 42+8 = 50, will be treated as malpractice.

Fifth Semester B.E. Degree Examination, June 2012 System Software

Time: 3 hrs.

Max. Marks: 100

Note: Answer FIVE full questions, selecting atleast TWO questions from each part.

PART - A

1 a. Explain the instruction formats and addressing modes of SIC/XE machine. (10 Marks)

 b. Write a program in both SIC and SIC/ XE to copy a character string 'system software' to another string. (10 Marks)

2 a. Explain the five fundamental functions of an SIC assembler.

(05 Marks)

b. Explain the data structures used in assembler algorithms.

(05 Marks)

 Generate the object code for each statement and write the object programs for the following SIC/XE program.

(Given that: LDX = 04, LDA = 00, LDB = 68, ADD = 18, TIX = 2C, JLT = 38, STA = OC, RESUB = 4C)

| KE2OB = 4 | HC). | |
|-----------|-------|-----------|
| SUM | START | 0 |
| FIRST | LDX | # O |
| | LDA | # O |
| | +LDB | # TABLE 2 |
| | BASE | TABLE 2 |
| LOOP | ADD | TABLE, X |
| | ADD | TABLE2, X |
| | TIX | COUNT |
| | JLT | LOOP |
| | +STA | TOTAL |
| | RSUB | |
| COUNT | RESW | 1 |
| TABLE | RESW | 2000 |
| TABLE2 | RESW | 2000 |
| TOTAL | RESW | 1 |
| | END | FIRST |
| | | |

(10 Marks)

a. List the machine independent features of assembler. Explain any two.

(10 Marks)

b. Explain the features of load–and–go assembler.c. Compare MASM assembler with SIC assembler.

(05 Marks) (05 Marks)

4 a. Write the code for boot strap loader. Explain briefly.

(05 Marks)

b. Explain the data structures used in linking loaders.

(05 Marks)

c. State and explain the various loader design options.

(10 Marks)

PART - B

| 5 | a. | Explain the four tasks involved in user–computer–dialogues of an editing system. | (04 Marks) |
|---|----------|--|-------------------------|
| | b. | Explain the editor structure, with diagram. | (08 Marks) |
| | c. | Explain the debugging functions and capabilities of interactive debugging system. | (08 Marks) |
| 6 | a. | Explain the data structures involved in macroprocessor algorithms. | (06 Marks) |
| | b. | Write an algorithm for one-pass macroprocessor. | (08 Marks) |
| | c. | Explain the features of general purpose macroprocessors. | (06 Marks) |
| 7 | a. | Explain the three basic sections of a LEX program. | (06 Marks) |
| , | | Write a LEX program to count number of words, characters and lines in a given fil | |
| | c. | Explain the following regular expressions, with example: | (00 Marks) |
| | | i) [] ii) {} iii) / iv) (). | (08 Marks) |
| 8 | a. b. | Define YACC tools. What are two types of conflicts in YACC? Give examples. Write a YACC program to validate a simple arithmetic expression involving | (10 Marks) operators |
| | | +, -, *, /. | (10 Marks) |
| | | | |

Fifth Semester B.E. Degree Examination, June 2012 **Operating Systems**

Time: 3 hrs.

Max. Marks: 100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

PART - A

- What is an operating system? Bring out the requirements of,
 - i) Real time operating systems.

Distributed operating systems. ii)

(10 Marks)

What are system calls? Explain the different categories of the system calls. b.

(10 Marks)

- Explain the process states with a diagram. What is the need for a context switch? (07 Marks)
 - What are the differences between user level threads and kernel supported threads? (05 Marks)
 - For the following example calculate average waiting time and average turn around time by using FCFS, preemptive SJF and RR (1 time unit) CPU scheduling algorithms.

| | Jobs | Arrival time | Burst time |
|--|----------------|--------------|------------|
| | P_1 | 0 | 8 . |
| | P ₂ | 1 | 4 |
| | P ₃ | 2 | 9 |
| | P ₄ | 3 | 5 |

- What is critical section problem? How does a semaphore solve the critical section problem? Discuss whether semaphores satisfy the three requirements for a solution to the critical section problem. (08 Marks)
 - What are monitors? Explain with an example program request.

(04 Marks)

- Describe the monitor solution to the classical dining philosopher's problem.
- (08 Marks)
- What is deadlock? Explain the necessary conditions for its occurrence.

(06 Marks)

Explain with an example how resource allocation graph is used to describe the deadlock.

System consists of five processes (P₀, P₁, P₂, P₃, P₄) and three sources (R₁, R₂, R₃). Resource type R₁ has 10 instances, resource type R₂ has 5 instances and R₃ has 7 instances. The following snapshot of the system has been taken:

| Jobs | Allocation | | Max | | | Available | | | |
|----------------|------------|----------------|----------------|-------|----------------|----------------|-------|----------------|----------------|
| | R_1 | R ₂ | R ₃ | R_1 | R ₂ | R ₃ | R_1 | R ₂ | R ₃ |
| P ₀ | 0 | 1 | 0 | 7 | 5 | 3 | 3 | 3 | 2 |
| P ₁ | 2 | 0 | 0 | 3 | 2 | 2 | | | |
| P ₂ | 3 | 0 | 2 | 9 | 0 | 2 | | | |
| P ₃ | 2 | 1 | 1 | 2 | 2 | 2 | | | |
| P ₄ | 0 | 0 | 2 | 4 | 3 | 3 | | | |

Calculate the content of matrix need and find out safe sequence by using Banker's algorithm. (08 Marks)

PART – B

| ; | 5 | a. b. | i) Logical address space and physical address space. ii) Internal fragmentation and external fragmentation. iii) Paging and segmentation. Explain with the help of supporting hardware diagram how the TLB imp | (06 Marks) proves the |
|---|---|----------|---|--------------------------|
| | | | a enformance of a demand naging system | (10 Marks) |
| | | c. | Given memory partitions of 100 K, 500 K, 200 K, 300 K and 600 K (in order) heach of the first fit, best fit and worst fit algorithms work place processes of 212 H 112 K and 426 K (in order)? Which algorithm makes the most efficient use of mer | , 41/ KIII |
| | | | - 1: 1 1:00 + toward of files | (05 Marks) |
| | 6 | a. | Explain the different types of files. | |
| | | b. | Name the different file allocation methods. Explain the linked allocation | (08 Marks) |
| | | | implementation with merits and demerits. | (07 Marks) |
| | | C. | Define file system. Explain the different directory structure. | (U/ Marks) |
| | | | What is disk scheduling? Explain any 3 disk scheduling methods with examples. | (10 Marks) |
| | 7 | a. | What is swap space management? Explain. | (05 Marks) |
| | | b. | What is swap space management? Explain. What is access matrix? Explain access matrix with domains as objects. | (05 Marks) |
| | | c. | What is access matrix? Explain access matrix with domains as objects. | |
| | 8 | | Write short notes on the following: | |
| | 0 | a. | D | (06 Marks) |
| | | 100,000 | 2 . 1 . 1.1 | (08 Marks) |
| | | b. | Steps in handling a page fault. | (06 Marks) |
| | | C. | Steps in nanuting a page fault. | |
| | | | | |

2 of 2

USN 06CS54

Fifth Semester B.E. Degree Examination, June 2012

Database Management Systems

Time: 3 hrs.

Max. Marks: 100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

PART - A

1 a. Discuss the main characteristics of the database approach. How does it differ from traditional file systems? (10 Marks)

Explain the component modules of DBMS and their interaction, with the help of a diagram.
 (10 Marks)

2 a. With a diagram, describe the three schema architecture of database systems. (04 Marks)

b. Discuss with examples, different types of attributes.

(06 Marks)

Design an ER diagram for keeping track of information about a hospital database taking into account atleast four entities. (10 Marks)

3 a. Consider the following two tables T_1 and T_2 . Show the results of the following operations. (Assume T_1 and T_2 are union compatible).

| Ta | ble 7 | Γ_1 |
|----|-------|------------|
| P | Q | R |
| 10 | a | 5 |
| 15 | b | 8 |
| 25 | a | 6 |

i)
$$T_1 \bowtie_{T_1 \cdot P = T_2 \cdot A} T_2$$

ii)
$$T_1 \Longrightarrow_{T_1 \cdot P = T_2 \cdot A} T_2$$

iii)
$$T_1 \bowtie T_2$$

$$T_1 \cdot P = T_2 \cdot A \text{ AND } T_1 \cdot R = T_2 \cdot C$$

v)
$$T_1 \bowtie T_2$$

 $T_1 \cdot Q = T_2 \cdot B$

(10 Marks)

b. Give the ER to relational mapping algorithm. Discuss each step, with an example. (10 Marks)

4 a. Consider the following schema:

SAILORS (sid, sname, rating, age)

BOATS (bid, bname, color)

RESERVES (sid, bid, day)

Write the queries in relational algebra to:

i) Find the names of sailors who have reserved boat number '103'.

ii) Find the names of sailors who have reserved a 'red' and a 'green' boat.

iii) Find the names of sailors who have reserved at least one boat.

iv) Find the names of sailors with age over 20 years, who have not reserved a red boat.

(12 Marks)

b. Explain IN and EXISTS operators of SQL with suitable examples.

(08 Marks)

PART - B

| 5 | a. | · · · | dation of 10 Marks) |
|---|----|---|------------------------|
| | b. | | database, 10 Marks) |
| 6 | a. | | r a set of 10 Marks) |
| | b. | | with an 10 Marks) |
| 7 | a. | Explain multivalued dependency and fourth normal form, with an example. | 10 Marks) |
| | b. | What are ACID properties? Explain. | 06 Marks) |
| | c. | Write and explain two phase locking protocol. | 04 Marks) |
| 8 | a. | 86 6 | ts? 06 Marks) |
| | b. | | 08 Marks) |
| | c. | | 06 Marks) |

* * * *

Fifth Semester B.E. Degree Examination, June 2012 Computer Networks – I

Time: 3 hrs.

Max. Marks:100

Note: Answer any FIVE full questions, selecting at least TWO questions from each part.

| PA | RT | $-\mathbf{A}$ |
|----|----|---------------|
|----|----|---------------|

| 1 | a. | What is data communication? What are the four important fundamental characterist | stics? (06 Marks) |
|---|----------------------|---|--|
| | b. c. | What is a protocol? Briefly explain its key elements. Explain the responsibilities of transport layer in OSI reference model. | (05 Marks) (09 Marks) |
| 2 | a. | Define bandwidth. A periodic signal has bandwidth of 20Hz. The highest frequency What is the lowest frequency? Draw the spectrum if the signal contains all frequency same amplitude. | cy is 60Hz. ncies of the (04 Marks) |
| | b. c. | Calculate the Shanon channel capacity in the following cases: i) Bandwidth = 20 kHz SNR _{dB} = 40 ; ii) Bandwidth = 200 kHz SNR _{dB} = 6 . Define line coding. Describe unipolar NR2, polar NR2–L, bipolar AMI and lencoding by applying on the information sequence 1010111100 . | (06 Marks) Manchester (10 Marks) |
| 3 | a. | An analog signal has a bit rate of 8000 bps and a band rate of 1000 band. How elements are carried by each signal element? How many signal elements do we not | (05 Marks) |
| | b. c. | Explain phase modulation with a neat diagram. What is time division multiplexing? Explain how statistical TDM over disadvantages of synchronous TDM. | (05 Marks) comes the (10 Marks) |
| 4 | a. b. c. | Briefly explain the coaxial cable and optical fiber with their applications. Find the codeword, using CRC given data word "1001" and generator "1011". What is internet checksum? With an example list the steps undertaken by the receiver for error detection. | (08 Marks) (06 Marks) sender and (06 Marks) |
| | | PART - B | |
| 5 | a. b. c. | Explain selection repeat ARQ with neat diagrams. What is piggybacking? List its usefulness. Explain the frame format and transitional phases of point-to-point protocol. | (08 Marks) (04 Marks) (08 Marks) |
| 6 | a. b. c. | A pure ALOHA network transmits 200-bit frames on a shared channel of 200 kl the throughout if the system produces 1000 frames per second. With a neat diagram explain CSMA/CD protocol. Explain the MAC sublayer of gigabit Ethernet | ops. What is (06 Marks) (08 Marks) (06 Marks) |
| 7 | a. b. c. d. | How does a VLAN reducer network traffic? | (08 Marks) (02 Marks) (04 Marks) (06 Marks) |
| 8 | a. b. c. | Give the architecture of ATM. Show how VPs and VCs are established. | (10 Marks) (06 Marks) (04 Marks) |

Important Note: 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.

2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.

| On comprehing your answers, compulsorily draw diagonal cross lines on the remaining blank pages. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice. |

Fifth Semester B.E. Degree Examination, June 2012 Formal Languages and Automata Theory

Time: 3 hrs.

Max. Marks:100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

PART - A

Define:

Powers of alphabet

ii) Strings

iii) Languages.

(06 Marks)

Write DFR for the following:

Set of all string not containing (110)

Set of all strings with exactly three consecutive O's. c. Convert the following NFA to DFA

(06 Marks)

δ $\rightarrow q_0$ q_0 q_0, q_1 q_1 *q2

(08 Marks)

2 a. For a given E-NFA, compute the following:

Compute E-closure of each state. i)

Give the set of all strings of length 3 or less accepted by the automation. ii)

Convert the automation to DFA.

(10 Marks)

| δ | € | Q | b |
|-----------------|------------|-----|--------|
| $\rightarrow p$ | {r} | {q} | {p, r} |
| q | ф | {p} | ф |
| *r | $\{p, q\}$ | {r} | {n} |

b. Prove that every language defined by RE is also defined by some finite automata.

c. Explain about text search for address pattern.

(06 Marks)

(04 Marks)

a. If L and M are regular languages prove that $L \cap M$ is also regular.

(03 Marks) Consider the homomorphism from the alphabet $\{0, 1, 2\}$ to $\{a, b\}$ defined by h(0) = ab, h(1) = b, h(2) = aa

What is h (2201)?

If L is language 1*02* what is h(L)?

iii) If L is the language $(ab + baa)^*$ bab what is $h^{-1}(L)$.

(09 Marks)

c. Construct the product of DFA.

(08 Marks)

Set of all strings of O's and 1's, whose number of O's equal to number of 1's. b. Consider the grammer $S \rightarrow s \, b \, s \, / \, a$. This grammer is ambiguous: show that particular string aba ba ba has two Parse trees ii) Left most derivations iii) Right most derivation. (10 Marks) c. Write any one application of CFG with example. (04 Marks) PART - Ba. Design a PDA P to accept language L_{WW}^r. Show that how PDA accepts string 1111 with TD. (10 Marks) Prove that for a PDA P there exist CFG such that L(G) = N(P). (10 Marks) a. Consider the grammer $S \to ASB/{\in}$ $A \rightarrow aAS/a$ $B \rightarrow sbs/bb$ Eliminate useless symbols Eliminate \in - productions iii) Eliminate unit productions iv) Put the grammer into CNF. (10 Marks) If L₁ and L₂ are CFL, then prove that family of context free languages are closed under union and concombination. (10 Marks) What is Turing machine and multi tape Turing machine? Show that languages accepted by these machines are same. (10 Marks) b. Design Turing machine to accept the language consisting of all palindromes of O's and 1's. (10 Marks) Write short notes on: Recursive languages Post's correspondence problems Universal Turing machine Language that is not recursively enumerable. (20 Marks)

Design CFG for the following:

Fifth Semester B.E. Degree Examination, June 2012 **Software Engineering**

Time: 3 hrs.

Max. Marks:100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

PART - A

| 1 | a. b. c. | Explain the types of software process model. What are professional and ethical responsibility of software engineering? Differentiate between technical computer based system and socio—technical system. With a relevant figure, bring out different disparities involved in software engineering. | (US Maiks) | | | |
|---|----------------|---|---|--|--|--|
| 2 | a. b. c. | Explain the concept of safety and security in system. Bring out the different factors of system dependability. Explain the software specification, with neat diagram. | (08 Marks) (06 Marks) (06 Marks) | | | |
| 3 | a. b. | Briefly list out eh non-functional requirements of software system. Explain the requirement engineering process, with relevant figures. | (10 Marks) (10 Marks) | | | |
| 4 | a. b. | Explain the different system models which can be created during analysis process Explain the management activities of a software manager. | (10 Marks) (10 Marks) | | | |
| | PART – B | | | | | |
| 5 | a. b. c. | What is need of architectural design decision? List out different models developed. Describe the concept of client – server model with a neat diagram. Explain the centralized control model. | that can be (08 Marks) (06 Marks) (06 Marks) | | | |
| 6 | a. b. c. | Explain the principles of agile methods. Explain the different types of software maintenance. Explain the software evolution process. | (08 Marks) (06 Marks) (06 Marks) | | | |
| 7 | a. b. c. | E 1: 1 Commenter teating | (08 Marks) (06 Marks) (06 Marks) | | | |
| 8 | a. b. c. | Explain the Maslow concept of motivating people | (05 Marks) (05 Marks) (10 Marks) | | | |

Important Note: 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.

2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8=50, will be treated as malpractice.

* * * * *
